Annotation

The development of tourism in Georgia began at the end of the 19th century and nowadays It has become one of the leading branches of the economy. In the last decade, its development has reached an unprecedented scale, which made led to an increase in tourist flows and their demands every year. The main factor in the development of tourism is the unique nature that our country is gifted with.

The master thesis deals with little-known touristic facilities of Khoni municipality, their development potential, Tourist routes which were created according to already well-known and still unknown tourist objects.

The municipality of Khoni has the resources to develop many types of tourism here, which will present the district in a new light and will emphasize its diversity.
